**FFS Standard Pricing:** Family Forward Surrogacy's traditional Standard Pricing allows IPs to take advantage of a lower flat fee for agency services. In this Standard Pricing model, the fee is paid per match with a single surrogate once she has passed medical and psychological screening. If that Surrogate does not deliver a baby for the Intended Parents, the IPs would have to pay an additional matching fee to be matched with a second surrogate.

**FFS Investment Protection Program (IPP):** The FFS IPP was developed as an alternative to the traditional flat fee payment for agency services. With the traditional flat fee payment structure Intended Parents pay a lower flat fee rate regardless of outcome. With the Family Forward Surrogacy Investment Protection Program Intended Parents pay a higher Agency fee, but the higher fee gives them the ability to obtain a refund of this agency fee minus a \$3,000 administrative fee if no baby is taken home from the hospital. The FFS IPP was designed for use only with specific IVF clinic's shared risk or money back guarantee programs.

<sup>6</sup> Necessary only if IP's do not have health insurance for a newborn born in the US. The low end of this range assumes \$3,000 in negotiated newborn care fees, and the high end assumes \$12,000 in negotiated newborn care fees (the high end could be much more in the event of premature birth or other significant newborn health issues).

<sup>7</sup> Using an ACA plan for newborn healthcare coverage for a child of International parent who does not intend to live in the U.S. is a controversial and unsettled issue. FFS **does not recommend** relying on the ACA for newborn health care coverage.

INVESTMENT PROTECTION PROGRAM TERMS AND CONDITIONS

Intended Parent's may withdraw from the program at any time unless the surrogate has begun medication for a specific cycle or if the surrogate is already pregnant with the Intended Parent's embryo(s). There will be an additional non-refundable fee of \$2,500 per cycle for each cycle after the third embryo transfer payable to the surrogate for the additional time, emotional strain and discomfort associated with undergoing each additional IVF cycle and transfer (this amount is paid per initiated cycle, after three initiated cycles) if any cycle is dropped through no fault of the surrogate). Please note that no surrogate can be forced to undergo a medical procedure against her will. If the Surrogate does not become pregnant and the reproductive endocrinologist recommends that another surrogate be found or if the surrogate decides that she would prefer not to proceed with the Intended Parents through no fault of their own, Family Forward Surrogacy will match the IP's with one additional surrogate at no additional charge.

As much as FFS would like to see all costs and fees returned to the Intended Parents if no baby is brought home from the hospital, **FFS cannot refund fees for services performed or expenses incurred by third parties.** Such costs include but are not limited to:

- medical costs and costs of medications and fees related to acquisition of donor egg or donor sperm
- fees for psychological screening
- fees already paid to Surrogate<sup>8</sup>
- surrogate expenses including travel, meals and lodging (to surrogacy related appointments)
- surrogate compensation for lost wages, childcare or housekeeping
- surrogate health and life insurance costs
- Attorney's fees
- Escrow account fee
